RCPE Associate NetIM

RCPE-A-NETIM

An associate level course covering how to use Riverbed's Network Infrastructure Management Solution, NetIM, to greatly improve business and IT performance.

The Riverbed® Certified Performance Engineering (RCPE) Associate NetIM course will demonstrate how to plan, size, install and configure a NetIM solution to manage your IT infrastructure.

From a network performance management perspective, NetIM provides the ability to:

- Access high-level network summary views and includes capabilities to drill down into device and interface specifics.
- Collect data using SNMP Polling and CLI access to network devices to retrieve and parse show command output.

- Build a virtual network model that can be used for real time or off-line analysis.

As part of this training, the design and implementation of a NetIM solution is covered with a focus on real-world use cases and network performance management. This training also includes walk-through demonstrations of specific NetIM features.

An RCPE Associate Accreditation exam in NetIM is offered after successful completion of this course.

Learning Objectives and Capabilities

After completing this course, participants will be able to:

- Design and implement a NetIM network performance management solution.
- Monitor network and infrastructure components using NetIM.

Relevant Solutions

- SteelCentral NetIM, SteelCentral NetProfiler, and SteelCentral AppResponse

Course Availability

Self-paced training is available to prospective students, which combines rich and interactive content delivered directly to your web browser and conducted at your own pace.

This course is available as a standalone module, but, if taken as a part of the RCPE accreditation track, completion of the RCPE Performance Foundations course is a mandatory requirement prior to attempting this course.

Course Outline

Module	Outcomes
Install and Deploy the Solution	- Describe how NetIM works - Plan for deployment - Size your solution - Install NetIM - Configure NetIM - Manage your IT infrastructure using NetIM
