RCPE Associate
Introduction to
Network Performance Management

RCPE-A-NPM

An associate level course covering solutions that provide greater visibility into your network and IT infrastructure.

The Riverbed® Certified Performance Engineering (RCPE) Associate Introduction to Network Performance Management (NPM) course introduces visibility solutions that provide greater control over your network and IT infrastructure, which is necessary as enterprises are transitioning into hybrid architectures and delivering more digital services.

Network performance management solutions provide:

- Visibility into network devices and interface health to ensure IT effectiveness and business productivity.
- Visibility into network configurations to troubleshoot changes made to the network.

As part of this introduction, the alignment of business performance challenges with network performance management solutions is covered with a focus on real-world use cases and end-to-end visibility. This training also includes walk-through demonstrations of Riverbed’s visibility solutions.

This introduction course does not offer an accreditation badge; however, an RCPE Associate Accreditation in Network Performance Management is offered for completion of the other three courses in this series:
- NetIM
- NetProfiler
- AppResponse

Learning Objectives and Capabilities

After completing this course, participants will be able to:

- Identify and address business performance challenges.
- Align Riverbed solutions to those performance challenges.
Relevant Solutions

- SteelCentral NetIM, SteelCentral NetProfiler, and SteelCentral AppResponse

Course Availability

Self-paced training is available to prospective students, which combines rich and interactive content delivered directly to your web browser and conducted at your own pace.

This course is available as a standalone module, but, if taken as a part of the RCPE accreditation track, completion of the RCPE Performance Foundations course is a mandatory requirement prior to attempting this course.

Course Outline

<table>
<thead>
<tr>
<th>Module</th>
<th>Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Identify Business Performance Challenges</td>
<td>• Identify business outcomes tied to the solution technology</td>
</tr>
<tr>
<td></td>
<td>• Identify the root causes of poor network and infrastructure performance</td>
</tr>
<tr>
<td></td>
<td>• Demonstrate the business value with improved visibility</td>
</tr>
<tr>
<td>Align Solutions to Performance Challenges</td>
<td>• Identify and explore approaches to holistic monitoring</td>
</tr>
<tr>
<td></td>
<td>• Optimize visibility solutions for hybrid environments</td>
</tr>
<tr>
<td></td>
<td>• Align solutions for network and infrastructure business requirements</td>
</tr>
</tbody>
</table>
