RCPE Associate NetProfiler

RCPE-A-NETPROFILER

An associate level course covering how to use Riverbed’s Flow Analyzer Solution, NetProfiler, to greatly improve business and IT performance.

The Riverbed® Certified Performance Engineering (RCPE) Associate NetProfiler course will demonstrate how to plan, size, install and configure a NetProfiler solution to manage, monitor, triage and troubleshoot networks and applications using metrics from flow collection.

From a network performance management perspective, NetProfiler provides the ability to:

- Use network traffic flow monitoring to proactively identify and quickly troubleshoot performance and security issues.
- Collect, store and analyze flow records from Flow Gateway and AppResponse 11.

As part of this training, the design and implementation of a NetProfiler solution is covered with a focus on real-world use cases and network performance management. This training also includes walk-through demonstrations of specific NetProfiler features.

An RCPE Associate Accreditation exam in NetProfiler is offered after successful completion of this course.

Learning Objectives and Capabilities

After completing this course, participants will be able to:

- Design and implement a NetProfiler network performance management solution.
- Monitor, triage and troubleshoot networks and applications using metrics from flow collection.
Relevant Solutions

- SteelCentral NetProfiler, SteelCentral NetIM, and SteelCentral AppResponse

Course Availability

Self-paced training is available to prospective students, which combines rich and interactive content delivered directly to your web browser and conducted at your own pace.

This course is available as a standalone module, but, if taken as a part of the RCPE accreditation track, completion of the RCPE Performance Foundations course is a mandatory requirement prior to attempting this course.
