

RCPE Associate AppResponse

RCPE-A-APPRESPONSE

An associate level course covering how to use Riverbed's Packet Capture and Inspection Appliance, AppResponse, to greatly improve business and IT performance.

The Riverbed® Certified Performance Engineering (RCPE) Associate AppResponse course will demonstrate how to plan, size, install and configure an AppResponse solution to manage, monitor, triage and troubleshoot networks and applications from a packet capture perspective.

In terms of network performance management, AppResponse provides the ability to:

- Receive packets via SPANS, TAPs, mirror ports, or packet brokers.
- Perform raw packet collection with storage supporting forensic analysis for performance and/or security.

- Triage issues in real time or historically using user-defined search criteria.

As part of this training, the design and implementation of an AppResponse solution is covered with a focus on real-world use cases and network performance management. This training also includes walk-through demonstrations of specific AppResponse features.

An RCPE Associate Accreditation exam in AppResponse is offered after successful completion of this course.

Learning Objectives and Capabilities

After completing this course, participants will be able to:

- Design and implement an AppResponse network performance management solution.
- Monitor, triage and troubleshoot networks and applications from a packet capture perspective.

Relevant Solutions

- SteelCentral AppResponse, SteelCentral NetIM and SteelCentral NetProfiler

Course Availability

Self-paced training is available to prospective students, which combines rich and interactive content delivered directly to your web browser and conducted at your own pace.

This course is available as a standalone module, but, if taken as a part of the RCPE accreditation track, completion of the RCPE Performance Foundations course is a mandatory requirement prior to attempting this course.

Course Outline

Module	Outcomes
Install and Deploy the Solution	<ul style="list-style-type: none">• Describe how AppResponse works• Plan for deployment• Size your solution• Install AppResponse• Configure AppResponse• Monitor, triage and troubleshoot networks and applications from a packet capture perspective
