

RCPE Professional Packet Analyzer Plus (PA+)

RCPE-P-PA+

This professional level course covers real-time network packet analysis and reporting of large trace files using the Packet Analyzer Plus packet visibility and analysis solution.

The Riverbed® Certified Performance Engineering (RCPE) Professional Packet Analyzer Plus course teaches IT professionals methods to access and easily visualize data behavior of both locally presented and remote packet captures, allowing simplified triage, troubleshooting, and monitoring of network application performance.

Upon completion of this course, participants will know how to use Packet Analyzer Plus to quickly identify network and application issues using an extensive collection of analysis views. Once identified, participants will be able to analyze packets within PA+, send them to embedded Wireshark® for decoding, or to Riverbed Transaction Analyzer for deeper transaction analysis. Participants will also gain hands on analysis and problem-solving experience.

The RCPE Professional Level Packet Analyzer Plus course is a key component of the RCPE Network & Infrastructure Visibility Track.

Learning Objectives and Capabilities

After completing this course, participants will be able to:

- Integrate AppResponse and Packet Analyzer Plus.
- Identify and download relevant packets.
- Apply views to jobs, traces, and trace clips.
- Visualize packets and Microflow Index data.
- Visualize Transactions with Sequence Diagram.
- Create filters and policies for triage.

Relevant Solutions Addressed:

- Riverbed SteelCentral Packet Analyzer Plus

Course Availability

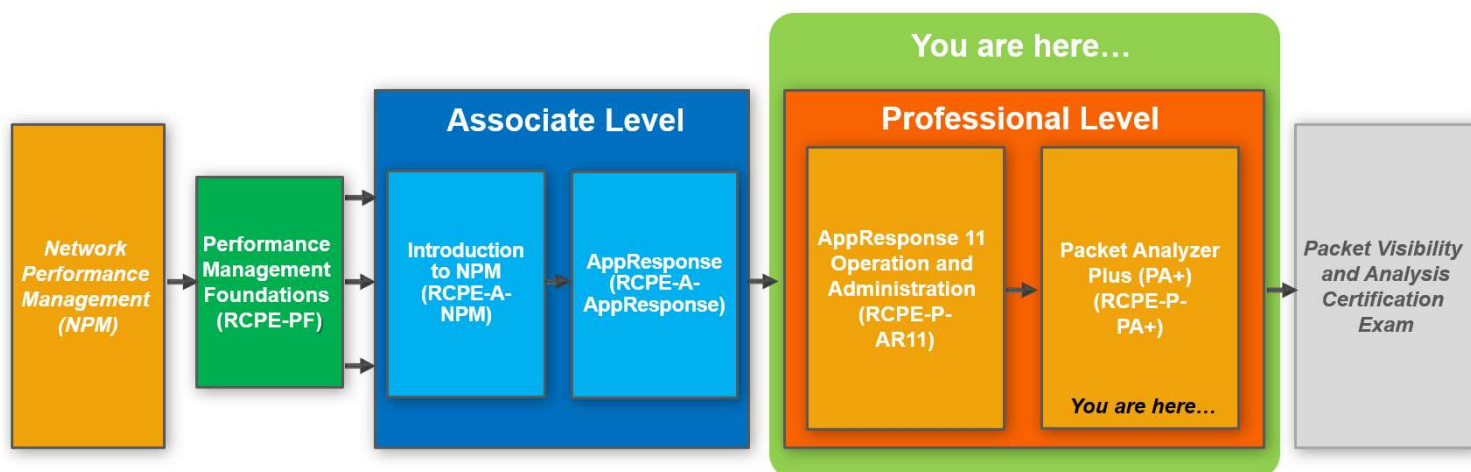

This course is available either as self-paced or instructor-led (virtual or physical), with both modes including access to the Riverbed eLabs for hands-on experience. Instructor-led sessions receive lectures and facilitation from a qualified Instructor.

Dedicated Classroom Training is available exclusively for one customer at a customer-designated facility. Each class includes lectures by a Riverbed Solution Instructor and access to the Riverbed eLabs. Each class is priced per event and is ideally suited for 8 students to 14 students.
